**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,596,945 B1 (Hughey).

Hughey discloses, referring primarily to figure 3, 1a superconducting cable comprising: a former (41) made of a normal-conducting metal (copper, col. 5, line 51); a first superconducting layer (43) formed around the outer circumference of said former and in electrical communication with the former; an electric insulating layer (46) formed around the outer circumference of said first superconducting layer; a second superconducting layer (49) formed around the outer circumference of said electric insulating layer; and a normal-conducting metal layer (47) is formed only between said electric insulating layer and said second superconducting layer; wherein said first and second superconducting layers are in a state cooled by a refrigerant (col. 4, lines 35-40) [claim 1], wherein said normal-conducting metal layer is formed by winding round wires with a round cross section or tape-shaped wires formed from a normal-conducting metal [claim 3], further comprising wire insulating layers around outer circumferences of the wires [claim 4], wherein said superconducting wires have a matrix ratio within a range between 1.5 or more and 3.0 or less (col. 7, lines 5-20) [claim 8].

***Response to Arguments***

Applicant's arguments with respect to claims 1, 3, 4, and 8 have been considered but are moot in view of the new ground(s) of rejection. However, the Examiner notes that in the case of Hughey, although there is a second normal conducting layer (45) located between the first superconducting layer (43) and the dielectric layer (46), the normal conducting layer (47) exists only between the dielectric layer (46) and second superconducting layer (49).

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
